You are the worst person I saw when I was born and opened my eyes you are my mother you raise and took care of me and my siblings up until the day you passed. I know you were in heaven and the best hands ever you're no longer suffering any illness. God saw the struggle you was going through and open the door, the Gates of heaven you were pure and you made it to your destination and one day we will be together again you me and my siblings. You are at rest now I love you I will always love you and we will see each other once again. I know you and my siblings are looking down and watching over me keeping me out of harm's Way you know I have my own illnesses now which I know was hereditary and one day God will bring us together once again I love you always love your baby girl Donna. I love you Mama
