“Mrs. Spraggins will never be forgotten by me. Upon our first introduction Fall 2012, she inquired if I was new in my job as a peritoneal dialysis nurse. I responded with a meek yes and her reply was, "you only get one chance to stick me for blood, so you better make it count,"

*Talk about pressure, I became a nervous wreck, but that would only last temporarily. I grew like her smile and straightforwardness, because she took the guess work out of trying to figure her out and she became one of my favorite patients. \*

*I saw her April 2015 with a walker and I was stunned. I told her the walker was only for a while and I would like to see her running around once her strength improved.*

*She thought she was calling me too much. I explained she could never bother or inconvenience me, her health was important to me and my goal was to help her get better. We did not have enough time.*

*I had the pleasure of meeting and watching Mr. Spraggins escort, transport and attentively care for his wife, that was a great example of their love. My heart has an ache since Mr. Spraggins notified me of his wife passing.*

*Mrs. Spraggins loved her three children and eagerly anticipated her youngest daughter returning from a broad. Your mom would smile anytime we had a conversation about you. She was a pride parent and marveled in your independence and accomplishments.*

*Finally, to you the family of Ronda Louise Spraggins, you are in my prayers, stay open to see and experience life's beauty.*

*Thank you for allowing me to be apart of her journey and trusting us, Davita, with her care.*

*She will be greatly missed!*
